

## Traffic Engineer

Newport Beach, CA

Full Time | 10+ years experience

Commercial Development Resources is looking for a Traffic Engineer who is a dynamic individual with an entrepreneurial spirit that is ready to start their own Traffic Engineering department. They shall have strong relationships with California clients, and contacts with local government agencies like CalTrans, County, and Cities. Experience managing traffic-related projects (analysis and/or design), including completing projects on schedule and on budget, QA/QC, and client management. The individual should be well rounded as a Traffic Engineer and have the capabilities of establishing a traffic presence for CDR in California.

CDR is a development partner that provides solutions to our clients in the form of civil engineering, surveying, construction management, and entitlement services. Along with our passion for land development, company culture is also essential. Please visit our website [www.cdrwest.com](http://www.cdrwest.com) for more information on our corporate mission and unique company culture.

### Responsibilities:

- Serve as the client and division manager for traffic-related services
- Leverage key relationships to assist CDR in regional growth by cross-selling services
- Market Traffic Engineering services and support transportation team business development (in the southern CA regional market)
- Train and mentor staff in the areas of traffic engineering-related services (i.e. studies, design, operational analysis, etc.)
- Supervise and direct the work of EITs, PEs, and CADD Technicians as appropriate on traffic-related projects
- Coordinate and work with traffic engineers

### Requirements:

- Bachelor of Science in civil engineering
- Licensed Professional Engineer in the state of California
- Expertise in Scoping Agreements, TDM, TIA, and VMT analysis
- At least 10 years of professional experience in project design, plan development and traffic analysis
- Strong working technical knowledge of traffic engineering principles and practices
- Strong verbal and written communication skills
- Strong client and partner relationships in the CA market
- Ability to serve as a mentor to other traffic engineers within CDR
- PTOE certification or the ability to obtain one within 1 year
