

## Don't Let Dry Utilities Slow Down Your Project's Success!

Hello,

Getting a [Dry Utility consultant](#) involved early in your project is more important than ever! Dry utility issues have become major obstacles to our clients' project schedules with impactful consequences to their bottom lines. Applicant demand is at an all time high, and the utility companies are struggling to keep up. Avoiding common pitfalls in the Dry Utility industry is paramount to your land development project's success. We explore several of these frequently made mistakes in our recent blog post, "[Four Common Dry Utility Pitfalls to Avoid During Project Planning.](#)"

Led by Director of Dry Utility Services, Eddie Pablos, our Dry Utility team has established relationships with key contacts that know and trust us. With over 40 years of combined experience working with local public and private utility companies in Southern California, we specialize in guiding our clients through the complex processes of this industry. To learn more about Eddie Pablos, check out his [Employee Spotlight article!](#)

In other exciting news, we'd like to congratulate Stormwater & Design Engineer, Hannah Lancaster, P.E. who was recently licensed as a professional engineer in the state of California. Hannah showed tremendous perseverance and dedication while earning her professional engineer's license, and our entire office applauds her achievement. Read the full press release [here!](#)

As always, please [reach out](#) with any of your civil engineering needs!

Regards,

**Aaron M. Albertson, P.E., SCDP**
