CDR Expands its Presence Across the United States!

Hello,

In response to the evolving needs of our clients, we are excited to expand CDR's presence across the United States! We recently [became licensed](#) in a number of additional states on both the east and west Coasts in an effort to assist our existing clients with projects outside of California. With licenses in Washington, Oregon, Idaho, California, Arizona, Nevada, Utah, South Carolina, North Carolina, and Tennessee, we now have the ability to offer our civil engineering services to new clients on the East Coast and serve a larger regional client base.

Led by Regional Engineering Manager, [Royce Eklund, P.E.](#), our [new east coast office](#) opened up on September 12 in Charlotte, North Carolina. Charlotte is a great place to grow in the Southeast Region and aligns CDR with the east coast time zone. We have great confidence in Royce's skill set and experience to spearhead this initiative, and are so pleased to have him on the team.

As always, please [reach out](#) with any of your civil engineering needs.

Regards,

Aaron M. Albertson, P.E., SCDP

Principal

Direct: 949.351.5325

Office: 949.610.8997 ext. 704
